

May 21, 2010

Pencom has recently made significant purchases of new manufacturing and inspection equipment. The acquisitions will be located at Pencom's China and Mexico manufacturing facilities to enhance global manufacturing and inspection capabilities. This sizeable investment demonstrates Pencom's ongoing commitment of providing customers with solutions for their volume and quality needs.

(2) Haas EC-400 Horizontal Machining Centers

Feature a horizontally mounted 20-hp spindle for better chip removal and faster machining. Dual rotating pallets allow simultaneous part machining and changeover thus greatly reducing cycle time.

Haas EC-400

(1) 401-MVA Microhardness Tester

Provides confirmation capability of surface hardness through discrete microscopically analyzed measurements.

401-MVA

(1) Supertec STC-20 Centerless Grinder

Creates precise external diameters and surface finishes.

Supertec ETC-20

(1) Fischer FMP-40 Coating Thickness Gauge

Permits verification of plating thickness from outside vendors.

Fischer FMP-40

(1) Zeiss Contura G2 Coordinate Measuring Machine

Allows unparalleled three-dimensional measurement accuracy of complicated parts with multiple machined features and curved surfaces.

Zeiss Contura G2
